CUSTOM FIT FAUX LEATHER SEAT COVER FRONT SEAT INSTALLATION

Please check all the parts before installation.
Start installing on driver side front seat first.

Any question? Feel free to ask us.
@gearflag

Upper Portion of Rear Seats

Please check all the parts before installation.

- 1** Release both rear seat headrests
Then put on the rear seat cover as shown below

- 2** Strap on the elastic straps from the seat cover to plastic disks as shown above

- 3** Slide all the disks through the gap between the upper portion and lower portion of the seats.

- 4** The black valcro type tape on the back of the seat cover will be able to stick on the cloth surface on the back of the rear seat to secure the seat cover in place.

Position all the disks into upright position against the back seat to secure the straps

Lower Portion of Rear Seats

- 5** Start with the larger side of seat cover
Put on the seat cover

Then lift up the lower portion of the seat

- 6** Clip on the buckle if available. You may also use the plastic disks available to connect two or more elastic straps

This is brand new seat cover, folding wrinkle will be found when taking out of box. Faux leather is flexible material. After fitting on the seats, the folding wrinkle will eventually disappear for certain of time. Due to the snug fit of the seat covers, some effort may be required for installation.

Lower Portion of Rear Seats

Please check all the parts before installation.

- ① For lower small portion of rear seat
Place the seat cover on the seat.

Then lift up the seat to
secure the elastic
straps

- ② Clip on the buckle if available.
You may also use the plastic
disks available to connect two
or more elastic straps

- ③ Zip up the center cover for armrest
Unzip it and remove if armrest is in
use.

- ④ Put on the headrest covers.
Secure with valcro straps.
